WELLNESS

Reverse Endocrine Diseases • Manage Chronic Conditions • Enhance Wellness & Longevity

Medical cannabis, also known as medical marijuana, is an herbal plant that has been used to treat ailments and conditions for centuries. Research has shown that medical marijuana can be a safe and effective treatment for some people under close physician supervision.

Medical cannabis is a broad term that includes all parts of the marijuana plant, from the seeds to the resin extraction. Low-THC (tetrahydrocannabinol) cannabis contains tiny amounts of the psychoactive compound, which may produce a “high” euphoric experience.

The use of medical cannabis is closely regulated by the State of Florida and can only be dispensed for approved conditions like:

- AIDs
- ALS (Lou Gehrig’s disease)
- Cancer
- Crohn’s disease
- Chronic nonmalignant pain
- Epilepsy
- Glaucoma
- HIV positive status
- Multiple Sclerosis
- Parkinson’s disease
- PTSD

IN SUMMARY...

- Under close medical supervision, medical cannabis (also known as medical marijuana) is a safe and effective treatment for some patients.
- The use of medical cannabis is closely regulated by the State of Florida and can only be dispensed for approved conditions.
- To receive medical cannabis, established patients must permanently reside in Florida, have a qualifying medical condition, tried other treatments without success and be in a situation where the benefits outweigh any potential risks.
- Patients interested in medical cannabis should call the office to schedule a certification consultation.*
- If approved, Dr. Mazza will create a treatment plan that includes an application for a Medical Marijuana Identification Card.*

* Not covered by health insurance.

To receive medical cannabis from Dr. Mazza, patients must meet the following criteria:

- You must permanently reside in Florida.
- You must be a patient of Dr. Mazza's and/or the Metabolic Center for Wellness.
- You must have a qualifying medical condition.
- You must have tried other treatments without success.
- The benefits must outweigh any potential perceived risk.

If you meet the criteria above and are interested in discussing medical cannabis with Dr. Mazza, schedule a certification consultation to determine if you qualify for treatment under the Florida regulated medical cannabis program. She'll also review your medical history and conduct an exam.

If approved for the program, Dr. Mazza will create a treatment plan that allows you to apply to the state of Florida for a Medical Marijuana Identification Card. You will have to present valid Florida identification such as a Florida State issued ID or a Florida driver's license. Please note, medical cannabis consultations and the application fee are not covered by health insurance.

ABOUT US

The **Metabolic Center for Wellness** is a unique medical practice established to reverse endocrine diseases, manage chronic conditions, and enhance wellness and longevity. Led by Dr. Angela Mazza, the practice takes an individualized, holistic approach to healthcare based on the latest medical findings. Whenever possible, she seeks to reduce medication dependency and improve quality of life through diet, exercise and supplement modifications. For the convenience of her patients, Dr. Mazza is one of a few Central Florida endocrinologists who offers key medical procedures and wellness therapies in the office. The practice has a strong focus on education—empowering patients to participate in their own healthcare decisions.

Key areas of focus include:

- Radiofrequency Ablation of Thyroid Nodules
- Thyroid Disease
- Hormonal Imbalance
- Bioidentical Hormone Pellet Therapy
- IV Therapy and Injections
- Nutraceuticals
- Medical Cannabis

Angela Mazza, DO, FAAMFM, ECNU, CDE, is triple-board certified in endocrinology, internal medicine, and anti-aging and regenerative medicine. She has served as a principal investigator for large-scale diabetes therapy and device trials; has presented at international medical conferences; was among the first physicians selected for the UCF College of Medicine; and serves as a formulation advisor to Douglas Laboratories.
