

IV NUTRIENT THERAPIES & BOOST INJECTIONS

Reverse Endocrine Diseases • Manage Chronic Conditions • Enhance Wellness & Longevity

Intravenous (IV) nutrient therapies and boost injections are fast and effective ways to improve overall health and treat a wide variety of medical conditions. Immediately absorbed into the body, these options are more powerful than oral supplements, especially for people with food intolerances, intestinal permeability issues (i.e., “leaky gut”) and other medical concerns.

IV infusions, which generally take about an hour, are administered in a special lounge area where you can bring your computer and get some work done with our high-speed wifi or simply enjoy a little quiet time.

Boost injections, also called injection therapy, are another easy way to provide important micronutrients. Like IV therapies, they don't rely upon the body's digestive process. They are quick and easy to administer, typically only taking minutes. *(more▶)*

Check out our pharmaceutical-grade IV therapies and boost injections for:

- Detoxification
- Disease Prevention
- Energy
- Healthy Aging
- Hydration
- Inflammation
- Immunity
- Mental Clarity
- Nutrition
- Pain Relief
- Weight Loss

IV THERAPIES												
DESCRIPTION		Detoxification	Disease Prevention	Energy	Healthy Aging	Hydration	Inflammation	Immunity	Mental Clarity	Nutrition	Pain Relief	Weight Loss
Meyers Cocktail IV	Our most requested nutrient-packed IV therapy, this cocktail is especially helpful for vegetarians missing key micronutrients; those with gut issues; nutrient loss from dieting and bypass surgery; and inflammation from stress, autoimmune disorders, weight gain and chronic pain. Contains: Calcium gluconate • Magnesium chloride • Vitamins B1, B2, B3, B5, B6 & B12 • Vitamin C			✓			✓	✓		✓	✓	
Quench IV	Helps boost hydration and prevents chronic dehydration, especially common among older adults. Contains: Copper • Magnesium Chloride • Manganese • Selenium • Vitamins B1, B2, B3, B5 & B6 • Vitamin C • Zinc					✓						
Metabolic Boost IV	A favorite of dieters, this helps burn fat instead of muscle, boosts energy during weight loss and aids in sustained ketosis (for those on the Keto diet). Contains: Arginine • Carnitine • Citulline • Glutamine • Lysine • Ornithine • Vitamins B1, B2, B3, B5 & B6			✓								✓
Immunity Boost IV	There has never been a better time to boost the immune system to help avoid COVID-19; lessen COVID symptoms should you catch it; and support the immune system before and after travel, and during surgical recovery. Contains: Vitamins B1, B2, B3, B5 & B6 • Zinc chloride		✓					✓				
NAD+ IV (NAD = nicotinamide-adenine dinucleotide)	Known as the body's "fountain of youth," this essential molecule is found in every living cell and helps fight cellular aging for more youthful looking skin; promotes brain health and mental clarity; helps with chronic fatigue; and supports physical endurance.			✓	✓				✓			
Glutathione IV (can be used in combination with other IV therapies)	This "master antioxidant" found in nearly all cells slows or prevents cellular damage caused by free radicals responsible for illnesses and aging; helps eliminate "brain fog" and/or "COVID brain"; eliminates toxic substances in the brain and liver; and is beneficial for those with autoimmune disorders.	✓			✓				✓			
Alleviate IV	Provides relief from chronic pain resulting from autoimmune disorders like Crohns Disease; lessens back pain; reduces inflammation from chronic pain that leads to other medical conditions; and helps manage menstrual cramps. Contains: Calcium chloride • Magnesium chloride • Vitamins B1, B2, B3, B5, B6 & B12		✓					✓			✓	
Recovery & Performance IV	Helps athletes and weekend warriors reduce muscle recovery time; and assists with overall physical performance. Contains: Arginine • Carnitine • Chloride • Citrulline • Copper • Glutamine • Lysine • Magnesium • Manganese • Ornithine • Selenium • Vitamins B1, B2, B3, B5 & B6 • Vitamin C • Zinc			✓		✓	✓				✓	
Inner Beauty IV	Promotes beauty from the inside out and is especially great for healthy skin and hair; it also helps with teenage acne. Contains: Biotin • Vitamins B1, B2, B3, B5 & B6 • Vitamin C				✓							

BOOST INJECTIONS								
DESCRIPTION		Disease Prevention	Energy	Healthy Aging	Inflammation	Immunity	Mental Clarity	Metabolism
Vitamin B12 Injection	Known as the "fat burner shot," this is a great option for dieters and those with low energy since it boosts the metabolism; burns and reduces stored fat; preserves muscle; aids liver and gallbladder function; and helps with mood and mental clarity. Contains: Amino Acids • Choline • Inositol • Methionine • Vitamin B12		✓				✓	✓
Vitamin C Injection	This is the body's must-have antioxidant to help prevent chronic illnesses, as well as reduce colds and flu. Contains: Vitamin C	✓				✓		
Vitamin D Injection	Like a shot of sunshine, this helps boost the immune system, prevent bone loss and protects against many illnesses. Contains: Vitamin D	✓						
Glutathione Injection	This important "master antioxidant" aids in detoxification; slowing the aging process; protecting the skin; reducing the impact of Type 2 diabetes; and reducing heart disease and inflammation. Contains: Glutathione	✓		✓	✓			

i If you'd like to know whether IV therapies and injection therapies are right for you, call our office or feel free to ask during your next appointment. For most people, there's absolutely no downside.

ABOUT US

The **Metabolic Center for Wellness** is a unique medical practice established to reverse endocrine diseases, manage chronic conditions, and enhance wellness and longevity. Led by Dr. Angela Mazza, the practice takes an individualized, holistic approach to healthcare based on the latest medical findings. Whenever possible, she seeks to reduce medication dependency and improve quality of life through diet, exercise and supplement modifications. For the convenience of her patients, Dr. Mazza is one of a few Central Florida endocrinologists who offers key medical procedures and wellness therapies in the office. The practice has a strong focus on education—empowering patients to participate in their own healthcare decisions.

Key areas of focus include:

- Radiofrequency Ablation of Thyroid Nodules
- Thyroid Disease
- Hormonal Imbalance
- Bioidentical Hormone Pellet Therapy
- IV Therapy and Injections
- Nutraceuticals
- Medical Cannabis

Angela Mazza, DO, FAAMFM, ECNU, CDE, is triple-board certified in endocrinology, internal medicine, and anti-aging and regenerative medicine. She has served as a principal investigator for large-scale diabetes therapy and device trials; has presented at international medical conferences; was among the first physicians selected for the UCF College of Medicine; and serves as a formulation advisor to Douglas Laboratories.
